Major Causes of Conflict in Marriages

Why Do You Think There Is An Increase In Domestic Violence?

Results are based on a nationwide telephone survey of 2,189 phone-owning adults, aged 18 and older, and conducted from the 16th – 20th April 2012. For results based on this sample size, we can say with 95% confidence that the margin of error is plus or minus 4 percentage points. The margin of error reflects the influencing of data weighting, while question wording and practical difficulties in conducting surveys may introduce error or bias into the findings of public opinion polls..
